

## Covid-19

# People Counting Occupancy Management System

“This is the time for facts, not fear. This is the time for science, not rumours. This is the time for solidarity, not stigma. We are all in this together, and we can only stop it together.”

*Dr Tedros Adhanom Ghebreyesus, Director General of the World Health Organisation*

Social distancing is proving to be a critical weapon in the fight against the spread of Covid-19.

To ensure this takes place in our vital public spaces, limits have been set on the number of people allowed access to shops and other enclosed public areas.

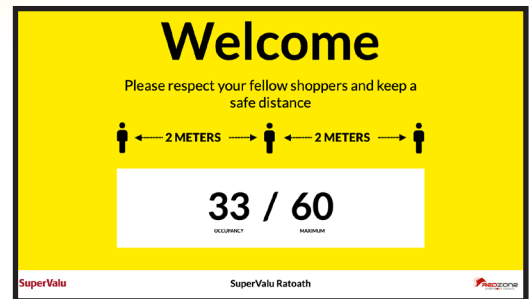

Managing this has only been possible by putting front line staff in close proximity to the public in an effort to control access to facilities.

**TRU**Count is a high-tech solution to this situation, reducing the cost and interaction between staff and the public by accurately counting persons entering and leaving a facility in real time.

**TRU**Count incorporates the most accurate technology available and uses the latest IOT technology to relay this information in a clear visual manner to persons entering a building, enabling them to manage their social distancing in a safe environment.

**TRU**Count is a highly flexible solution that can monitor all types of entry/exit points, even when serving two separate spaces. Multiple entrances can be grouped together giving an overall or segmented count.

**TRU**Count not only provides you with an accuracy of up to 99.5%, it is also 100% GDPR compliant. Our integration team can customise the system to control automatic doors and lifts, provide custom alerts and unique solutions to all your occupancy issues both now and into the future.

Live numbers online in real time

Up and running in a local SuperValu in Ratoath, Co. Meath

**CONTACT OUR SALES TEAM TODAY** for more details on how **TRU**Count can help you control your occupancy levels during this difficult time.
